EDUCATION

VIT UNIVERSITY, VELLORE

MCA (1ST YEAR)

2025–Present

Relevant: DSA, DBMS, ML

IIT MADRAS

BS IN DATA SCIENCE (ONLINE)

2021–Present | CGPA: 7.5

UNIVERSITY OF LUCKNOW

BCA

CGPA: 8.5 / 10

ARMY PUBLIC SCHOOL

CLASS 12 — 95.2%

2021

ARMY PUBLIC SCHOOL

CLASS 10 — 96.2%

2019

SKILLS

Languages

C++, Python, Java, SQL, JavaScript, TypeScript

CS Fundamentals

Data Structures, Algorithms, OS, DBMS, OOP

Web & Backend

React, Vue.js, Node.js, Express, Flask, REST APIs

AI & ML

LLMs, OpenAI API, Pandas, NumPy, Scikit-Learn

Tools

GitHub, Linux/WSL, Docker (basic), MySQL, Redis, Celery

Other

Debugging, Testing, Documentation, Problem-Solving

CERTIFICATIONS

HackerRank: Python, Java, SQL (Advanced)

Meta Front-End Developer — 2024

Advanced AI & ML — Udemy (2024)

Java & .NET Development — HackerRank

ADDITIONAL INFO

Open to relocation

Strong adaptability

Quick learner

SUMMARY

Software Engineering student with strong foundations in data structures, algorithms, and full-stack development. Experienced in building real-world applications using React, Vue, Flask, Redis, and Node.js. Developed ML and AI-driven systems, automation tools, and production-style data pipelines. Quick learner with a growth mindset, strong debugging skills, and experience working in collaborative team environments.

EXPERIENCE

TRAINING & PLACEMENT CELL

TECHNICAL COORDINATOR

Oct 2022 – Jul 2024 | Lucknow University

- Coordinated with multiple stakeholders to streamline processes, improving efficiency by 15%.
- Resolved technical and operational issues through structured problem-solving.
- Documented workflows and maintained communication across departments.
- Built strong collaboration skills by working with students, faculty, and companies.

PROJECTS

QUIZ MASTER WEB APP

Vue.js, Flask, Redis, Celery

- Built a full-stack quiz platform with timed quizzes and leaderboards.
- Implemented async workflows using Redis + Celery for high responsiveness.
- Designed modular Flask APIs with authentication and clean routing.

HOUSING SERVICES APP

Flask, SQLite3, JS

- Developed a service-booking platform connecting users with providers.
- Implemented booking flow, role-based dashboards, and CRUD operations.
- Ensured clean backend architecture and optimized DB interactions.

LLM CODE DEPLOYMENT SYSTEM

LLMs, GitHub API, Automation

- Built an API that verifies signed POST requests and uses an LLM to generate and deploy apps.
- Automated repo creation, MIT licensing, commits, and GitHub Pages deployment.
- Sent evaluation callbacks (repo, commit, Pages URL) and supported round-2 updates.
